

Seikatsu
EVERYDAY LIFE

Seikatsu

Normal Life, Made Easier for
Newcomers to Japan

A supermarket-style e-commerce platform
for packaged food and daily essentials,
curated specifically for people newly
settling in Japan.

The Settlement Challenge

- Newcomers face a **sudden shift in lifestyle and food culture**.
- Language barriers make even basic shopping confusing and stressful.
- Japanese supermarkets are designed for local consumers, who understand product labels, brands, and cultural norms.
- For international arrivals, this creates **decision fatigue and emotional discomfort** during the critical early settlement phase.

Introducing Seikatsu

Seikatsu is a **curated, retail-style marketplace** that sells packaged bento meals and daily essentials with country-based personalization. This is not a restaurant, delivery app or cloud kitchen.

Seikatsu operates as a **starter supermarket** designed exclusively for newcomers to Japan, offering the certainty and comfort people need during their first weeks and months of settlement.

- Retail-focused

Packaged goods, ready to eat meals

- Culture-aware

Personalized by home country

- Curated selection

Limited, intentional choices

What We Sell

Packaged Bento Meals

Ready-to-eat or reheat meals with fixed menus. Familiar flavors adapted to Japanese ingredients, plus introductory Japanese options for cultural exploration.

Starter Survival Kits

Comprehensive first-week essential bundles. Everything a newcomer needs to get through their initial days—toiletries, basic food, household items.

Daily Essentials

Non-food necessities like toiletries, kitchen utensils, cleaning supplies, and personal care items with clear labeling and familiar brands where possible.

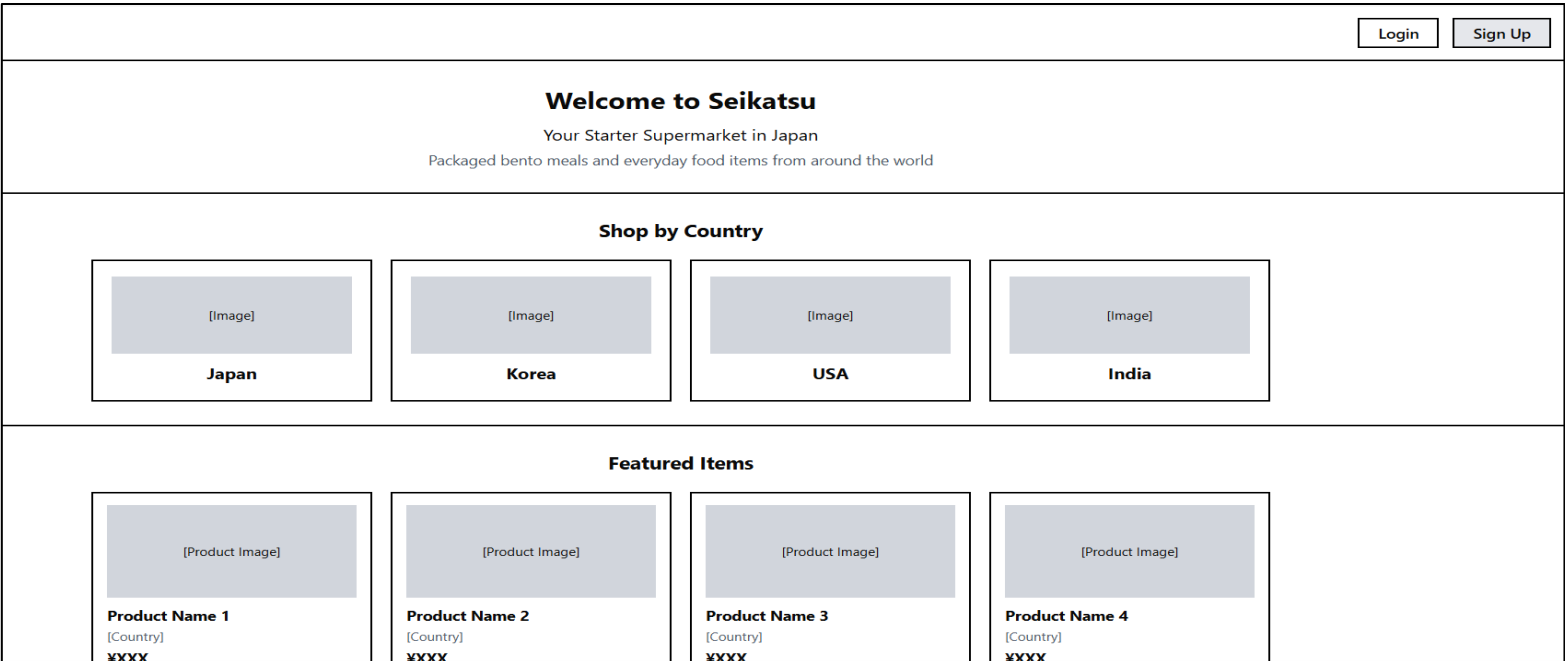

Comfort Items

Familiar snacks, spices, tea, coffee, and small indulgences from home countries that provide emotional comfort during the adjustment period.

How Seikatsu Works

- **Landing Page**
Users start on a public landing page to understand Seikatsu and explore country based packaged food categories without logging in.
- **Login & Access**
Users sign up or log in to enable purchasing, cart usage and order tracking.
- **Product Browsing**
Selects Home Country. A unified product catalog displays packaged food items tagged by country (Japan, Korea, USA, India). Users can browse freely or filter by country and view detailed product information.
- **Multi Country Cart**
Users can add items from multiple countries into a single cart. Products are clearly labeled by country, quantities can be adjusted, and a single total price is calculated.
- **Checkout & Orders**
Users review their cart, confirm checkout through a dummy payment process and place a single order containing all selected items.
- **Purchase History**
Past orders are stored and displayed with order date, items purchased, country information, and total amount.
